

# TIME IS MONEY. PROTECT THEM BOTH.

If your business handles a lot of cash, get your hands on an NKL® Autobank Validating Safe. These patented, standalone or networkable units use the latest validating technology to verify bills, keep an up-to-the-minute safe balance, and automatically total and print a bank deposit slip (dramatically reducing "back room" management time). You can even manage them remotely. Choose the single-bill model, or count up to 25 bills at once with our new bulk-validating model. Either way, you'll spend less time counting money and more time making it.

The Smarter Way To Handle Cash

# NKL® Autobank Validating Safes

NKL products are still by far the #1 choice in convenience stores, quick-serve restaurants, and other high-cash-volume environments. NKL was the first manufacturer to introduce a networkable line of safes; safes with technology so revolutionary it has been patented (U.S. Patent #7,063,252). With our modular safe system, you can buy the safe you need today, and then add more safes as your needs require. Our Validating Safes are no exception. Once the system is in place, you can add additional validators that can all be operated remotely by the CPU. This results in a streamlined reporting system, including audits and information-gathering, from all your safes into one, central location.

## NKL Single-Bill Validating Safes

- Built to commercial safe standards
- Features 3/8" doors with drill-resistant hard plate and automatic three-point bolt-work
- Withstands sophisticated tool attacks
- Positive bill authentication
- Software enabling positive I.D. for up to 100 users
- 20,000-line audit trail
- Time delays and time locks
- Single- and dual-validator models available

MODEL	DESCRIPTION	NOTE CAPACITY	EXT. DIMENSIONS	SHIP WEIGHT
V1C	Autobank Bill Validating Safe w/CPU - Single	1500	24" x 10" x 21"	186 lbs.
V1R	Autobank Remote Bill Validating Safe - Single	1500	24" x 10" x 21"	186 lbs.
V2C	Autobank Bill Validating Safe w/CPU - Dual	3000	24" x 17" x 21"	242 lbs.
V2R	Autobank Remote Bill Validating Safe - Dual	3000	24" x 17" x 21"	242 lbs.

## NKL Bulk Validating Safes

When bills are plenty and time is short, choose NKL's Bulk Validator. The V1 model offers a 2000-note capacity with a front-load style JCM validator. The feeder can handle a stack of up to 25 bills at a time. Rejected bills are sent to a reject tray just above the deposit tray. And since the entire feeder and head assembly can be pulled without opening the secure compartment, it's easier than ever to clear bill jams and service the unit. This capability to service the validator without exposing the deposited money is unique to FireKing® Security Group and is patent pending. The Bulk Validator is available in Controller and Remote units, and can be fully integrated with other Autobank models.

MODEL	DESCRIPTION	NOTE CAPACITY	EXT. DIMENSIONS	SHIP WEIGHT
V1C-JBS	Bulk Validating Safe w/CPU	2000	32" x 10" x 22"	201 lbs.
V1R-JBS	Remote Bulk Validating Safe	2000	32" x 10" x 22"	201 lbs.
V2C-JBS	Bulk Validating Safe w/CPU - Dual	4000	32" x 17" x 22"	223 lbs.
V2R-JBS	Remote Bulk Validating Safe - Dual	4000	32" x 17" x 22"	223 lbs.
