

Summit Series

Combined Bill Validating and Vertical Tube Dispensing Units

Cloud-based cash management solution delivering a central repository of real-time business analytics to optimize your cash

The combined Summit bill validating and tube dispensing units can meet all your cash management needs. Summit devices make real-time business analytics and cash handling information available to your entire organization. As money is deposited into the safe, the cash is validated, automatically counted and secured. The same level of detail is captured for all dispensing activities. With a Summit unit, individual retail locations are continuously feeding information to the cloud, providing a single fact base of data that is immediately available across operations. With immediate visibility of detailed cash transactions across all your locations, the ability to maximize cash flow, while reducing deposit discrepancies and cash shrinkage, is greatly enhanced. In addition, the time staff spends counting, re-counting and reconciling deposits is greatly reduced. The value of Summit devices can be measured in your bottom line.

Validate and deposit bills, while dispensing coin and bills in convenient clear tubes

- Dual bill validators with standard or high-capacity cassettes featuring single note or bulk note feeds
- Self clearing capability
- Set dispense limit for maximum withdrawals by transaction or business day
- Time delays between dispenses can be set at the system level or by user
- Eight columns of ten tubes each for an 80 tube capacity
- Can dispense rolled coin, loose coin and notes in tubes
- Automatic count as you load and dispense
- Can buy change or dispense on credit
- Secure access by User Number, Pin, iButton or Biometrics standard
- State-of-the-art encryption for secure communications
- Real time help menu with printable screens
- Daily credit capable
- Remote software upgrades
- High speed thermal printer
- Web-based reporting

SPECIFICATIONS

Exterior Dimensions: 25"H x 13.5"W x 23"D

Weight: 227 lbs

shown with optional 7" riser

Tube Dispensing Unit: UTD

Exterior Dimensions: 28.5"H x 13.5"W x 24.625"D

Weight: 278 lbs

Features Of The Summit Cloud-based System

- Cloud-based suite of BI capabilities for data mining and remote management.
- Modular design allows for “hot-swapping” of device components greatly improving serviceability of units in the field.
- Security between the safe and the cloud servers provided through state-of-the-art encrypted VPN channel using certificate based authentication.
- Plug and play capability with no software loaded in the field, no system or network configuration required. Simply plug in the power and network cables and the system draws down its configuration, reducing deployment and maintenance time and effort.
- Remote monitoring of device and component health with email and RSS alerts enabling preventative and predictive maintenance.
- Remote system access from any PC, laptop, tablet or smart phone device through web-based reporting provides visibility anytime, anywhere to cash handling activity and positions.
- Remote user management, enabling addition, deletion or modification of any users remotely.
- Detailed transaction reporting by user, day or shift with consolidated reporting across multiple locations provides visibility of cash handling activities.
- Unlimited number of users with the ability to store over 100,000 transactions to support discrepancy analysis.
- Built-in user guide providing real-time access to help menu with step-by-step instructions.

SUMMIT SERIES DEVICES CAN BE NETWORKED UTILIZING YOUR EXISTING COMMUNICATIONS INFRASTRUCTURE TO ENABLE CASH TRANSACTION DATA EXCHANGE, REMOTE ACCESS MANAGEMENT, AND BROADCAST ALERTS.
