“We use Armor’s cash control safes to handle more than \$280,000 per month. The safe has paid for itself in only a year. Before installing the safe, we had people stealing up to \$1,000 a month. The safe has drastically reduced that number. We even caught employees stealing the very first day we had the safe.”

— Rex Majors, Vice President of Tejano Marts in Texas

The CacheSYSTEM® 2400 series saves time, boosts productivity, and increases employee security with less cash exposure. It is ideal for cash-intensive businesses that do not require change fund management. The 2400 series provides cash security and greater employee accountability through an audit trail that connects each transaction to a registered user. Closing out cash registers is more efficient and deposit preparation is reduced from hours to minutes.

2400 SERIES SAFES:

COLLECT & SECURE CASH:

Once your cash is placed in an Armor safe, you can rest assured it will stay there. Our products are designed and constructed to rigorous standards to protect each point of access and reduce your risk of robbery.

COUNT & VALIDATE FUNDS:

Each safe is equipped with casino-quality bill validators that provide the highest level of first-time bill acceptance and unsurpassed counterfeit detection. Counted funds are secured in cassettes for easy transport and deposit. This series may be fitted with one or two validators.

AUDIT & REPORT ACTIVITY:

Every transaction is recorded and tracked through each user's personal identification number (PIN), providing a seamless audit trail. More than 30 different types of receipts and reports can be printed on the system's high-speed printer, including end-of-day activity, cash removal, and individual user reports.

COMMUNICATE:

The 2400 series integrates effortlessly with application service providers, allowing real-time access to analytics and transaction data remotely or from the back office.

2400 MODELS

Our CacheSYSTEM® 2400 safes provide cash security and greater employee accountability through an audit trail that connects each transaction to a registered user. Cash register close-out is more efficient and error-free while deposit preparation is reduced from hours to minutes.

Specifications

1200 note validator dimensions:
12"W x 18"D x 25 1/4"H (31"H with optional base)

Power supply

auto ranging for domestic or international use

2400RBH MODELS

Our CacheSYSTEM® 2400RBH safes feature bill validators that can be removed to clear the occasional bill jam without having to open the safe's main door. While the bill heads are removed, previously deposited notes remain inaccessible as they're securely stored in cassettes inside the safe that can only be retrieved once the safe's main door is open.

Specifications

1200 note validator dimensions:
12"W x 23"D x 25 1/4"H (31"H with optional base)

Power supply

auto ranging for domestic or international use

INDUSTRY LEADING WARRANTY

Every Armor safe is accompanied by a standard one year parts and labor warranty. Our peers' standard labor warranties typically only last for 90 days. Extended warranties are also available.

"We want to run our business in a way that tells a potential robber, 'This isn't going to be easy'. Our CacheSYSTEM® safe tells robbers and employees that we take this cash management business very seriously."

— Frank Hutchins, General Manager of Linmar Petroleum in California

LIFETIME SUPPORT

Every customer receives free 24/7 phone support for the lifetime of their safe. Every Armor safe includes a thorough user manual and quick reference guide to get you started. Individual or group training classes are also available.

24/7 SUPPORT

FEATURES

OVERVIEW

STRUCTURAL FEATURES

- Memory stores up to 188,000 transactions
- High speed thermal printer
- Ethernet interface
- Easy upgrading and maintenance
- Locking or non-locking 1200-note or 2200-note cassettes
- Single or bulk-note MEI SC Advance™ bill validators

CONFIGURATIONS

OVERVIEW

SINGLE VS BULK NOTE EXPLAINED

Each 2400 Series safe comes equipped with either one or two bill acceptors which validate and count deposited notes and secure them in the safe. Single note bill validators accept notes that are presented one bill at a time. Bulk note bill validators improve efficiency by allowing users to present a stack of up to 30 notes at once, reducing the amount of time required to process cash and doing so in a way that improves both security and customer service. Notes are quickly moved out of the user's hands, minimizing queue times and cash exposure while reducing the cash maintained in tills.

CASSETTE SIZE EXPLAINED

Each bill validator in an Armor 2400 series safe deposits the cash it receives into a cassette secured within the safe. Our standard 2400 safes come equipped with one 1200 note cassette per bill validator, a very popular configuration that meets the needs of most cash-handling businesses. For businesses with higher volumes of deposited cash, we also offer our XL safes which are instead equipped with a larger 2200 note cassette per bill validator. Cassette locks and transport bags are optionally available for either our 1200 note or 2200 note cassettes to improve their security while in transit between the safe and the bank.
